

# LYME LIVES HERE

## Lyme Disease Facts

- Lyme (like) disease is across Australia – city suburbs and bush alike.
- Prevent tick bites with DEET insect repellent and tucked in clothing.
- Seek trained evaluation and preventative treatment after a tick bite.
- Lyme (like) disease affects men, women & children of all ages.
- Lyme (like) disease can cause mild, moderate and severe symptoms and if left untreated can be fatal.
- Lyme (like) disease mimics other diseases like Multiple Sclerosis, Parkinson's disease, Alzheimer's disease, Motor Neurone disease, Autism and Chronic Fatigue Syndrome to name a few.
- If your current doctor is not Lyme-aware and fails to acknowledge your concerns or symptoms, persist in finding one who will evaluate you.
- Lyme (like) disease treatment should continue until symptoms resolve.
